JOURNAL: Section: C, Section No. 1004, Vol. 16, No. 544, Pg. 153,
November 13, 1992 (19921113)

ABSTRACT

PURPOSE: To obtain the subject medicine for external use, excellent in its effects without requiring a fear of generating resistant bacteria by blending hinokitiol or its derivative with other ingredients.

CONSTITUTION: The subject medicine is obtained by blending 0.1-5% hinokitiol or its derivative as a principal ingredient with other ingredients. Blood circulation in the skin is promoted with the hinokitiol to supply blood to the bed sore or ulcerated parts. Furthermore, bacterial contamination in the bed sore or ulcerated parts is improved by sterilizing action of the hinokitiol to prevent the resistant bacteria from appearing. An antiulcer agent such as allantoin or azulene is preferably used together with the aforementioned medicine for the external use.
